Training Course: Oil And Gas Accounting Level 2

Training Course code: FI2065 From: 23 November - 4 December 2026 Venue: London (UK) - Training Course Fees: 9450
€ Euro

Introduction

This course provides participants with a thorough, in-depth review and examination of international accounting standards and their application in the upstream oil and gas industry. This will include a review of unique accounting issues that arise in exploration and production activities and best practices for accounting for these.

Participants will learn about Production Sharing Contracts PSCs, the different aspects that are included in PSCs, and the accounting consequences that can arise. This course will address joint venture accounting and alternative methods of how joint ventures can be funded. Unitization and redetermination of oil and gas fields will also be covered.

The final part of this course will give participants an awareness of the different approaches that can be used in the preparation of an annual department and corporate budget. The strategic issues that companies consider in planning their future growth and development will also be discussed.

Objectives

- Enhance understanding of international accounting standards applied to upstream oil and gas E&P activities
