Training Course: Excellence in Warehouse and Inventory

Training Course code: PU4049 From: 25 October - 5 November 2026 Venue: Amman (Jordan) - Training Course Fees: 6350 € Euro

Introduction

Effective management of warehouses and inventory is essential for procurement and supply chain success. In today's fast-paced market, companies need to ensure that their warehousing systems and inventory levels are optimized to deliver superior customer service while minimizing costs. This program covers key concepts and strategies to enhance warehouse and inventory management practices, focusing on improving efficiency, reducing waste, and ensuring better control over stock. Participants will gain practical skills to apply in real-world scenarios, helping them manage warehouses and inventory with a focus on improving customer satisfaction and operational performance.

Objectives

By the end of this program, participants will:

- Understand the principles of warehouse and inventory management.
- Learn how to analyze inventory demand and forecast accurately.
- Implement strategies for effective inventory replenishment and level management.
- Master stock control methods and movements.
- Apply ABC analysis for inventory management.
- Develop skills to select and maintain warehouse equipment.
- Learn warehouse layout options and planning to optimize space and flow.
- Gain knowledge of health, safety, security, and cost management in warehouse operations.
- Improve productivity and performance through the use of key performance indicators KPIs.
- Understand how to create a continuous improvement framework for warehouse and inventory processes.

Target Audience

This program is ideal for:

- Warehouse Managers and Supervisors
- Inventory Managers and Procurement Professionals
- Supply Chain Managers and Logistics Professionals
- Operations Managers looking to optimize warehouse and inventory management
- Business Analysts focused on improving inventory control and warehouse efficiency
- Anyone interested in improving warehousing, inventory management, and supply chain performance
