Training Course: Understanding of financial analysis

Training Course code: FI2057 From: 29 June - 3 July 2026 Venue: London (UK) - Training Course Fees: 5775 € Euro

Introduction

This seminar brings together important areas of financial management, planning, and control: Financial Analysis, Planning, and Control; Setting & Controlling Budgets. It will help business professionals:

- Plan more effectively for the future
- Use the financial techniques of planning and control
- Improve performance from the use of the tools of financial analysis
- Link planning and budgeting with costing and performance measurement
- Master the skills of budgetary and cost control

Objectives

The seminar provides delegates with the knowledge required to find better answers to questions such as:

- Which specific variables, relationships, and trends are likely to be helpful in analyzing problems?
- How reliable are available financial data, and how are uncertainty and risk likely to impact on the outcomes of decisions?
- In economic and financial analysis what are the implications and relative importance of cash flow as distinct from accounting profit?
- What limitations are inherent in financial data and the key financial statements, and how will these affect the financial analysis?
- How important are qualitative judgments in the context of decision-making?

and to focus on key issues such as:

- Understand strategic planning and budgeting.
- Link finance and operations for budgeting purposes and strategy execution
- Learn how to build a comprehensive performance measurement system
- Learn costing and budgeting terminology used in business

- Understand the importance of a well-defined costing and budgeting process
- Understand cost behavior more accurately
- Be able to perform and interpret variance analysis
