Training Course: Safety Management Best Practices

Training Course code: HE7001 From: 26 - 30 July 2026 Venue: Amman (Jordan) - Training Course Fees: 4550 € Euro

Introduction

Safety management has evolved significantly as organizations increasingly integrate Health, Safety, and Environmental HSE Management Systems into broader corporate management frameworks. Modern best practices emphasize proactive risk management, structured risk assessments, and performance measurement against predefined targets, rather than relying solely on prescriptive regulations.

This program provides participants with practical experience in implementing advanced safety management principles applicable across multiple industries. Delegates will learn to measure reactive, active, and proactive safety performance, fostering a culture of continuous improvement.

Objectives

By the end of this program, participants will be able to:

- Understand key safety Codes of Practice, including COMAH for onshore installations.
- Implement the Safety Case concept for fixed and mobile offshore installations.
- Apply incident root-cause analysis to promote a positive safety culture.
- Conduct task-based risk assessments focusing on human error and system failures.
- Apply best practices in Project Health, Safety & Environmental Reviews PHSER, linking to Capital Value Processes CVP and HSE Management Systems.
- Set targets, plan initiatives, implement strategies, and measure safety performance effectively.

Target Audience

- HSE Managers and Officers
- Safety Supervisors and Coordinators
- Project Managers and Engineers involved in high-risk operations
- Compliance and Risk Management Professionals
- Personnel responsible for safety planning, audits, and reporting
