Paris (France)*

## Training Course: Budgeting and Cost Control for Supply Chain and Procurement Professionals

Training Course code: FI235639 From: 3 - 14 August 2026 Venue: Paris (France) - Training Course Fees: 9450 € Euro

### Introduction

This training program, designed by Global Horizon Training Center, is crafted specifically to address the unique financial and cost management challenges faced by supply chain and procurement professionals. Effective budgeting and cost control are critical in optimizing supply chain efficiency, reducing procurement costs, and ensuring alignment with organizational financial goals. This course provides participants with the practical skills, tools, and techniques to create accurate budgets, control costs, and enhance decision-making in the procurement and supply chain functions.

### Objectives

- Develop comprehensive budgets that accurately reflect supply chain and procurement needs.
- Apply cost control strategies to manage expenses effectively.
- Analyze and interpret financial data to inform supply chain and procurement decisions.
- Identify cost-saving opportunities across the supply chain.
- Implement budgeting tools and methodologies to enhance financial oversight in procurement.
- Assess supplier cost structures to drive better negotiation outcomes.
- Monitor and manage budget variances and understand their organizational impact.
- Use forecasting techniques to improve budgeting accuracy in dynamic environments.

### Methodology

The course utilizes a blend of lectures, case studies, group discussions, and hands-on exercises. Participants will work on real-world scenarios and analyze case studies to reinforce learning. Interactive sessions and group activities allow participants to share experiences, while role-playing exercises simulate practical cost management and budgeting situations.

### Organizational Impact

- Improved financial management in procurement and supply chain activities.
- Enhanced budget accuracy, reducing overspending and financial surprises.

- Better decision-making through improved cost analysis and financial acumen.
- Increased alignment of procurement practices with strategic organizational goals.
- Strengthened supplier negotiations and cost-saving initiatives.

## Target Audience

- Supply chain managers
- Procurement and purchasing managers
- Financial analysts in supply chain functions
- Budget analysts
- Cost control and finance managers in supply chain roles
- Professionals involved in budget planning, cost management, or resource allocation in procurement and logistics
