Training Course: Project Management From Design to Execution

Training Course code: MA235070 From: 16 - 27 November 2026 Venue: Singapore - Training Course Fees: 10000 € Euro

Introduction

The Project Management Training Program, developed by Global Horizon Training Center, is designed to equip professionals with the skills and knowledge necessary to manage projects effectively from initiation to execution. Project management involves a variety of tasks, including defining the project scope, allocating resources, creating timelines, managing risks, and ensuring successful project completion. This program covers all aspects of project management in depth, from designing project plans to monitoring and closing projects, ensuring participants are well-prepared to lead successful projects.

Objectives

By the end of this training program, participants will be able to:

- Define project scope, goals, and objectives
- Create comprehensive project plans, timelines, and schedules
- Allocate resources effectively and define roles and responsibilities
- Monitor project progress and adjust plans as needed
- Identify and manage project risks and issues
- Lead project teams and motivate team members
- Implement Agile methodology in project management
- Successfully close out projects, documenting outcomes and lessons learned
- Identify and avoid common project management pitfalls

Target Audience

This program is ideal for:

- Project Managers, Team Leaders, and Executives responsible for managing projects
- Professionals seeking to develop or enhance their project management skills
- Individuals interested in advancing their careers in project management
- Suitable for professionals across a wide range of industries including business, government, healthcare, education, and nonprofit sectors
- No prior experience in project management is required

Outline

Day 1: Introduction to Project Management

- Definition of Project Management: Understanding the fundamentals
- Role of the Project Manager: Key responsibilities and tasks
- Key Skills for Project Management: Communication, leadership, and organization
- Overview of the Project Life Cycle: Initiation, planning, execution, monitoring, and closure

Day 2: Project Initiation

- Defining Project Scope, Goals, and Objectives: Establishing project foundation
