Training Course: Business Analysis: Essentials

Training Course code: MA234825 From: 21 - 25 September 2026 Venue: Paris (France) - Training Course Fees: 5775 € Euro

Introduction

In today's data-driven and fast-changing business environment, organizations rely heavily on effective business analysis to ensure that projects deliver real value and align with strategic objectives. The **Business Analysis: Essentials** program is designed to provide participants with a foundational understanding of the role, responsibilities, and impact of a business analyst within an organization.

This program introduces the full business analysis lifecycle, covering both pre-project activities such as strategy analysis and post-implementation evaluation. Participants will learn how business analysts support projects throughout the solution development lifecycle—from identifying business needs and defining solution scope to eliciting, analyzing, and validating requirements.

Course Objectives

By the end of this program, participants will be able to:

- Understand the role and responsibilities of a business analyst
- Recognize the importance of requirements in successful project delivery
- Identify different types of requirements and how they are managed
- Apply core business analysis processes across the project lifecycle
- Understand pre-project strategy analysis and post-project activities
- Plan, elicit, analyze, document, and validate requirements
- Apply basic modeling techniques e.g., process modeling using BPMN
- Understand industry standards and frameworks for business analysis
- Support solution development and ensure value realization

Target Audience

This program is designed for:

- Current and Aspiring Business Analysts
- Project Managers and Program Managers
- Executives and Business Managers
- IT Professionals and Programmers
- Anyone working with or supervising business analysts
