Marine Integrated Management Systems*

*18 - 22 October 2026
Cairo (Egypt)*

Training Course: Marine Integrated Management Systems

Training Course code: MM234703 From: 18 - 22 October 2026 Venue: Cairo (Egypt) - Training Course Fees: 4410 € Euro

Introduction

Modern maritime operations require a holistic and integrated approach to managing safety, security, environmental performance, quality, and compliance. Rather than operating separate systems, organizations are increasingly adopting **Marine Integrated Management Systems (MIMS)** to align standards such as **ISM Code, ISPS Code, MLC 2006, and ISO frameworks** into a unified structure.

This program, developed by **Global Horizon Training Center**, provides participants with a comprehensive understanding of how to design, implement, and manage integrated systems in maritime organizations. It focuses on aligning operational processes, compliance requirements, and performance management into a single, efficient framework.

Participants will gain practical insights into integrating multiple management systems, improving coordination, enhancing compliance, and driving continuous improvement across maritime operations.

Course Objectives

By the end of this program, participants will be able to:

- Understand the concept and structure of Marine Integrated Management Systems
- Integrate ISM, ISPS, MLC, and ISO standards into a unified system
- Develop and implement integrated policies and procedures
- Improve coordination between safety, security, HR, and operations
- Monitor performance through integrated KPIs and reporting systems
- Conduct audits and ensure compliance across multiple frameworks
- Enhance operational efficiency and reduce duplication of processes
- Support continuous improvement and organizational excellence

Target Audience

This program is designed for:

- Marine and Fleet Managers
- Safety, Security, and Compliance Managers
- Ship Management and Operations Personnel
- Marine HR and Crewing Managers
- Port and Terminal Managers
- Maritime Authority and Regulatory Staff

Outline

Day 1: Introduction to Integrated Management Systems in Maritime

- Concept and benefits of integrated management systems
- Overview of key frameworks ISM, ISPS, MLC, ISO
- Challenges of managing multiple systems separately
- Structure of a Marine Integrated Management System
- Case studies on integrated systems

Day 2: System Design and Integration Frameworks

- Mapping organizational processes and workflows
- Aligning policies across safety, security, HR, and environment
- Integrating documentation and procedures
- Developing unified management system structures
- Risk-based thinking in integrated systems

Day 3: Implementation and Operational Integration

- Implementing integrated systems in maritime organizations
- Roles and responsibilities across departments
- Communication and coordination mechanisms
- Training and competency alignment
- Operational control and monitoring

Day 4: Performance Management, Audits, and Compliance

- Integrated KPIs and performance measurement
- Internal audits across multiple standards
- Preparing for external inspections and certification
- Managing non-conformities and corrective actions
- Continuous improvement frameworks

Day 5: Digitalization, Sustainability, and Strategic Integration

- Digital tools for integrated management systems
- Data integration and reporting systems
- ESG and sustainability integration
- Future trends in maritime management systems
- Final workshop: Designing a Marine Integrated Management System
