Training Course: Integrated Treasury and Project Execution

Training Course code: SC235593 From: 16 - 27 November 2026 Venue: Kuala Lumpur (Malaysia) - Training Course Fees: 10300 € Euro

Introduction:

Treasury and project management are critical functions within any organization, essential for ensuring financial stability, effective cash flow management, and the successful execution of projects. Treasury management focuses on overseeing the organization's financial assets, investments, and liquidity, while project management ensures that strategic initiatives are planned, executed, and delivered efficiently, on time, and within budget.

In this 10-day training program, participants will gain a comprehensive understanding of both treasury management and project management practices. The program covers the core concepts of treasury functions, including cash management, risk mitigation, investment strategies, and compliance with regulatory requirements. In parallel, the project management aspect explores the tools and techniques required to plan, execute, and control projects, ensuring their alignment with organizational goals.

By integrating treasury and project management, participants will develop the skills to manage financial resources effectively while ensuring successful project outcomes. This program is designed for professionals in treasury roles, financial analysts, project managers, and corporate strategists who seek to enhance their expertise in both disciplines.

Objectives:

- To understand the principles of treasury management, including cash flow, liquidity, and risk management.
- To learn effective project management methodologies, including planning, execution, and monitoring.
- To explore the relationship between financial management and project success.
- To gain practical skills in managing financial risks associated with project execution.
- To develop the ability to create strategic financial plans that support successful project delivery.
- To examine the role of treasury management in supporting capital projects and long-term investments.
- To apply project management tools and techniques in the context of treasury operations.
- To ensure compliance with regulatory requirements in both treasury and project management.

Target Audience:

- Treasury Managers and Financial Controllers
- Project Managers and Coordinators

- Corporate Strategists and Financial Analysts
- Risk Management Professionals
- Investment Analysts
- Senior Executives involved in financial decision-making
- Professionals responsible for capital project financing
