Training Course: Project Management for Supply Chain Professionals

Training Course code: PC4006 From: 21 - 25 September 2026 Venue: Barcelona (Spain) - Training Course Fees: 5775 € Euro

Introduction

Supply management and project management share a common structure: both manage the flow of activities over time with defined inputs, outputs, and objectives. Integrating project management principles into supply management enhances the ability to plan, execute, control, and monitor supply chain initiatives effectively.

This program equips supply professionals with the tools, techniques, and methodologies of project management, enabling them to apply structured approaches to improve supply chain performance, reduce risk, and optimize resources.

Course Objectives

Upon completion, participants will be able to:

- Organize, plan, launch, track, and close projects in a supply chain context.
- Develop clear project objectives and work breakdown structures WBS.
- Master project planning, execution, and control techniques.
- Identify and manage the skills required for effective project teams.
- Apply project scheduling and cost estimation techniques.
- Integrate scope, time, cost, and quality considerations into project planning.
- Identify improvement opportunities within supply chains using project principles.
- Demonstrate proficiency in project decision-making and reporting.
