Training Course: Workforce Economics: Understanding Employment Trends

Training Course code: FI235592 From: 14 - 18 December 2026 Venue: Bangkok (Thailand) - Training Course Fees: 6350
€ Euro

Introduction:

Labor Economics is a critical field of study that explores the dynamics of labor markets, the behaviors of employers and employees, and the factors that influence employment, wages, and productivity. As economies evolve and industries change, understanding labor economics becomes essential for businesses, governments, and policymakers to design effective labor policies, foster economic growth, and promote fair labor practices.

This training program delves into the fundamental principles of labor economics and addresses key issues such as labor supply and demand, wage determination, the role of labor unions, and the impact of technology on employment. It also examines the social and economic factors influencing the labor force, including demographic shifts, education, and skills development, as well as the global trends that are reshaping labor markets.

Participants will gain a comprehensive understanding of how labor markets operate and the challenges associated with employment, unemployment, and wage inequality. The course will also provide insights into policy responses aimed at improving labor market outcomes, particularly in terms of productivity, workforce development, and inclusive growth. By the end of the program, participants will be equipped with the analytical tools and practical knowledge needed to navigate the complexities of labor economics in today's world.

Objectives:

- To provide a comprehensive understanding of labor market dynamics and the key theories in labor economics.
- To explore the determinants of labor demand and supply, and how these factors affect employment levels and wages.
- To analyze wage determination, wage disparities, and labor market segmentation.
- To examine the role of labor unions, collective bargaining, and labor market regulations.
- To study the effects of technological change, globalization, and immigration on labor markets.
- To investigate the impact of education, skills development, and demographic trends on labor supply.
- To assess labor policies, including minimum wage laws, social protection, and employment incentives.
- To develop practical skills for evaluating labor market data and trends for policy or business strategy development.

Target Audience:

- Human Resources Professionals

- Labor Market Analysts
- Economists and Researchers
- Government Officials in Labor and Employment Sectors
- Business Leaders and Corporate Strategists
- Trade Union Representatives
- Policy Makers in Social and Economic Planning
- Employment and Career Development Professionals
