Training Course: Developing Consultant Level Capability in Implementing ISO-14001

Training Course code: MA9347 From: 6 - 10 July 2026 Venue: London (UK) - Training Course Fees: 5775 € Euro

Introduction

Environmental management has become a strategic priority for organizations aiming to achieve sustainability, regulatory compliance, and operational excellence. The [ISO 14001 Environmental Management System EMS](#) standard provides a globally recognized framework for managing environmental responsibilities systematically.

This program, developed by [Global Horizon Training Center](#), is designed to build consultant-level capabilities in implementing ISO 14001. It equips participants with advanced knowledge of EMS requirements, implementation methodologies, auditing techniques, and best practices. Participants will learn how to design, implement, maintain, and improve an EMS while supporting organizations in achieving certification and long-term environmental performance improvement.

Course Objectives

By the end of this program, participants will be able to:

- Understand the structure and requirements of ISO 14001
- Interpret ISO 14001 clauses and apply them in real-world scenarios
- Develop and implement an Environmental Management System EMS
- Conduct environmental aspects and impacts assessments
- Ensure compliance with environmental laws and regulations
- Develop environmental policies, objectives, and programs
- Prepare organizations for ISO 14001 certification audits
- Perform internal audits and continuous improvement activities
- Provide consultancy-level guidance for EMS implementation

Target Audience

This program is designed for:

- Environmental Managers and Officers
- HSE Health, Safety, and Environment Professionals
- ISO Consultants and Auditors
- Quality and Compliance Professionals
- Operations and Facility Managers
- Engineers and Technical Professionals
- Professionals seeking to become ISO 14001 consultants
