Training Course: Certified in Logistics, Transportation, and Distribution

Training Course code: SC235675 From: 5 - 9 October 2026 Venue: Kuala Lumpur (Malaysia) - Training Course Fees: 6300 € Euro

Introduction

Logistics, transportation, and distribution are essential components of modern supply chains, ensuring the efficient and timely movement of goods from origin to end customers while balancing cost, speed, and service quality. As global markets become more complex, effective logistics management has become a key driver of operational success and customer satisfaction.

The Certified in Logistics, Transportation, and Distribution program by Global Horizon Training Center provides participants with practical knowledge and skills to manage and optimize logistics operations. The program covers transportation management, warehouse operations, distribution planning, and supply chain integration, with a strong focus on efficiency and cost optimization.

Through case studies, workshops, and real-world applications, participants will learn how to identify operational inefficiencies, implement improvement strategies, and leverage modern logistics technologies to enhance performance and service delivery.

Objectives

By the end of this program, participants will:

- Understand the fundamentals of logistics and distribution management.
- Explore strategies for effective transportation and fleet management.
- Learn techniques to optimize warehouse operations.
- Analyze best practices for supply chain and inventory control.
- Enhance problem-solving and decision-making skills in logistics and distribution.

Target Audience

This program is ideal for:

- Logistics and transportation managers
- Warehouse supervisors and distribution planners
- Supply chain professionals
- Operations and procurement personnel

- Anyone involved in logistics and distribution processes

Outlines

Day 1:
