Training Course: Monitoring and Evaluation of Risk Management

Training Course code: MA234810 From: 20 - 24 July 2026 Venue: Cape Town (South Africa) - DoubleTree by Hilton Cape Town - Upper Eastside Training Course Fees: 6350 € Euro

Introduction

In today's results-driven and risk-sensitive environment, organizations must adopt structured approaches to monitor and evaluate both program performance and associated risks to ensure sustainability and informed decision-making. The **Monitoring and Evaluation of Risk Management** program is designed to equip participants with the advanced knowledge and skills required to design, implement, and manage effective monitoring and evaluation M&E systems integrated with risk management practices.

Monitoring and evaluation are increasingly recognized as essential components of effective program and project management, enabling organizations to assess performance, improve accountability, and support continuous improvement. This program focuses on combining results-based management approaches with risk management methodologies to ensure that projects deliver intended outcomes while effectively managing uncertainties.

Course Objectives

By the end of this program, participants will be able to:

- Understand key principles of monitoring and evaluation in projects and programs
- Apply results-based management concepts in performance monitoring
- Develop and apply Theory of Change and Logical Framework approaches
- Design and implement monitoring and evaluation frameworks
- Identify and develop performance indicators for projects and programs
- Manage data quality and conduct data quality assessments
- Plan and conduct evaluations and develop evaluation reports
- Develop Terms of Reference ToR for evaluations
- Understand key risk management concepts and frameworks
- Develop risk management plans and maintain risk registers
- Identify and assess project risks using qualitative and quantitative methods
- Monitor and control project risks through reassessment and audits
- Integrate risk management into monitoring and evaluation systems

Target Audience

This program is designed for:

- Monitoring and Evaluation M&E Officers and Specialists
- Risk Managers
- Project Managers
- Project Management Office PMO Members

- Project Sponsors
- Functional Managers
- Senior Management
- Professionals seeking to enhance M&E and risk management capabilities

Outline

Day 1 - Foundations of Monitoring and Evaluation

- Introduction to monitoring and evaluation concepts and principles
- Programme logic models and Theory of Change
- Results-Based Management RBM: concepts and applications
- Analyzing and reporting monitoring data for decision-making
- M&E in national and organizational strategic contexts

Day 2 - Integrating Risk Management with M&E

- Defining and classifying risks in projects
- Risk management frameworks and approaches
- Critical success factors in risk management
- Risk analysis tools and techniques
- Linking Theory of Change with results chains and outcomes
- Defining results, indicators, and performance measures

Day 3 - Designing M&E and Risk Frameworks

- Planning risk management and developing risk registers
- Designing monitoring and evaluation frameworks
- Structure and types of indicators
- Monitoring and maintaining M&E systems
- Roles and responsibilities in M&E and risk management
- Communicating M&E frameworks across stakeholders

Day 4 - Data Collection, Analysis, and Evaluation

- Methods and tools for data collection
- Techniques for data analysis and interpretation
- Using monitoring data for project management and reporting
- Process vs. outcome evaluation approaches
- Developing evaluation reports
- Strategic planning and problem analysis

Day 5 - Advanced Evaluation and Risk Analysis

- Performing qualitative and quantitative risk analysis
- Designing and planning evaluations
- Managing evaluation processes and resources
- Disseminating and utilizing evaluation results
- Designing and implementing monitoring systems

- Managing data quality and continuous improvement
- Leadership, motivation, and conflict management in project environments
