Training Course: Advanced Management Program for Energy Professionals

Training Course code: EN236393 From: 16 - 20 August 2026 Venue: Istanbul (Turkey) - DoubleTree by Hilton Istanbul Esentepe Training Course Fees: 6825 € Euro

Introduction

The Advanced Management Program for Energy Professionals is a high-level, integrated development program designed to equip experienced professionals in the energy sector with advanced management, leadership, and strategic decision-making capabilities. The program addresses the complex operational, financial, regulatory, and strategic challenges faced by energy organizations operating in volatile, capital-intensive, and highly regulated environments.

This training program is designed and delivered by Global Horizon Training Center, drawing on international best practices, cross-sector management frameworks, and real-world energy industry scenarios. The program blends strategic thinking with operational excellence, enabling participants to transition from technical or functional roles into broader managerial and leadership responsibilities while aligning business objectives with sustainability, performance, and risk considerations.

Program Objectives

By the end of this program, participants will be able to:

- Strengthen strategic and managerial decision-making in energy organizations
- Apply advanced leadership practices suitable for complex, multi-stakeholder environments
- Enhance financial, commercial, and operational awareness relevant to the energy sector
- Manage risk, compliance, and governance challenges effectively
- Lead teams and projects with a performance-driven and results-oriented mindset
- Align operational execution with long-term organizational strategy

Target Audience

This program is designed for:

- Energy Sector Managers and Senior Professionals
- Oil, Gas, Power, and Renewable Energy Leaders

- Technical Professionals transitioning into management roles
- Asset, Operations, and Project Managers
- Strategy, Planning, and Business Development Professionals
- High-potential talent identified for leadership succession

Outline

Day 1 - Strategic Management in the Energy Sector

- Overview of the global energy landscape and market dynamics
- Strategic challenges facing traditional and emerging energy businesses
- Competitive positioning and value creation in energy organizations
- Strategic planning frameworks for energy companies
- Aligning corporate strategy with operational realities
- Executive decision-making in uncertain environments

Day 2 - Leadership and Organizational Effectiveness

- Leadership styles and competencies for energy professionals
- Managing multidisciplinary and multicultural teams
- Building high-performance cultures in technical organizations
- Change management in energy transformation initiatives
- Stakeholder engagement and internal alignment
- Leadership communication for complex organizations

Day 3 - Financial, Commercial, and Performance Management

- Financial fundamentals for energy managers
- Capital allocation, budgeting, and cost control
- Commercial decision-making and contract awareness

- Performance measurement and KPI design
- Managing profitability across the energy value chain
- Linking financial outcomes to operational performance

Day 4 - Risk Management, Governance, and Compliance

- Enterprise risk management in the energy sector
- Operational, financial, and strategic risk identification
- Governance frameworks and managerial accountability
- Regulatory compliance and industry standards
- Managing HSE, ESG, and sustainability expectations
- Crisis management and leadership under pressure

Day 5 - Operational Excellence and Future-Focused Leadership

- Operational excellence models for energy organizations
- Integrating technology, innovation, and digital transformation
- Leading energy transition and sustainability initiatives
- Talent development and succession planning
- Executive action planning and application roadmap
- Program wrap-up, key takeaways, and strategic alignment
