Training Course: AI-Driven Strategic Leadership and Intelligent Management

Training Course code: LS236395 From: 15 - 19 June 2026 Venue: London (UK) - Training Course Fees: 5775 € Euro

Introduction

In an era defined by rapid digital transformation and data-driven decision-making, Generative Artificial Intelligence (GenAI) and Machine Learning (ML) have emerged as powerful drivers of strategic leadership and organizational excellence. These technologies are no longer limited to technical domains; they are reshaping leadership practices, strategic planning, operational management, and organizational innovation across industries.

This training program, meticulously designed by Global Horizon Training Center, provides senior leaders, executives, and managers with a comprehensive understanding of how Generative AI and Machine Learning can be leveraged to enhance strategic thinking, optimize decision-making, strengthen leadership effectiveness, and drive sustainable organizational growth.

The program bridges the gap between advanced AI technologies and leadership practices by translating complex technical concepts into practical strategic applications. Participants will explore real-world use cases, leadership frameworks, and strategic models that integrate AI capabilities into organizational governance, business strategy, innovation management, and performance excellence.

By the end of the program, participants will be equipped with the knowledge, tools, and strategic insights required to lead their organizations confidently in the age of Generative AI and intelligent systems.

Objectives

By the end of this training program, participants will be able to:

1. Understand the fundamental concepts of Generative AI and Machine Learning and their relevance to leadership and management.
2. Analyze the strategic implications of AI on organizational leadership, governance, and decision-making.
3. Integrate AI-driven insights into strategic planning and business transformation initiatives.
4. Apply Generative AI tools to enhance leadership effectiveness, innovation, and organizational performance.
5. Develop AI-informed leadership strategies and management frameworks.
6. Assess risks, ethical considerations, and governance issues related to AI adoption.
7. Design AI-enabled organizational strategies aligned with business objectives.
8. Lead change and digital transformation initiatives supported by AI technologies.
9. Evaluate organizational readiness for AI-driven transformation.

10. Formulate actionable roadmaps for implementing AI in leadership and management practices.

Course Methodology

The program adopts a blended, executive-focused learning approach that includes:

- Strategic lectures and conceptual frameworks
- Interactive discussions and executive dialogues
- Case studies from global organizations
- Practical demonstrations of Generative AI and ML applications
- Group workshops and leadership simulations
- Scenario analysis and strategic decision-making exercises
- AI-driven leadership tools and templates
- Best practices and benchmarking
- Strategic roadmap development exercises
- Knowledge sharing and expert facilitation

Organizational Impact

Upon completion of this program, organizations will benefit from:

- Enhanced strategic leadership capabilities supported by AI-driven insights.
- Improved quality and speed of decision-making.
- Stronger alignment between digital transformation and organizational strategy.
- Increased innovation and competitive advantage.
- More effective change leadership in AI-driven environments.
- Improved governance and risk management related to AI adoption.
- Higher organizational agility and adaptability.
- Data-driven culture across leadership and management levels.

- Sustainable growth through intelligent leadership practices.
- Clear organizational roadmap for AI integration.

Target Audience

This program is designed for:

- Senior executives and C-level leaders CEOs, CFOs, CIOs, CTOs, COOs
- Directors and department heads
- Strategic planning and business development leaders
- Digital transformation and innovation leaders
- Government and public sector leaders
- HR leaders and organizational development professionals
- Project and program managers
- Risk, governance, and compliance professionals
- High-potential leaders and future executives
- Consultants and advisors

Outline

Day 1: Foundations of Generative AI and Machine Learning for Leaders

- Introduction to Artificial Intelligence, Machine Learning, and Generative AI
- Evolution of AI and its impact on leadership and management
- Differences between traditional analytics, ML, and Generative AI
- Strategic relevance of AI in modern organizations
- AI-driven leadership paradigm and digital leadership models

- Understanding AI capabilities and limitations from a leadership perspective
- Overview of AI ecosystems and tools relevant to leaders
- Case studies of AI-driven leadership transformation
- Leadership mindset in the age of AI
- Executive framework for AI-informed leadership

Day 2: AI-Driven Strategic Thinking and Decision-Making

- AI and data-driven strategic decision-making
- Machine Learning models and their strategic applications
- Generative AI in strategic planning and scenario building
- Predictive analytics for leadership decisions
- AI-supported risk analysis and opportunity identification
- Strategic foresight using AI tools
- Integrating AI insights into corporate strategy
- AI-enabled business intelligence for leaders
- Decision-making biases and AI mitigation strategies
- Case studies in AI-based strategic decisions

Day 3: AI in Leadership, Innovation, and Organizational Transformation

- Generative AI in leadership communication and influence
- AI-enabled innovation and creative leadership
- AI in organizational design and process optimization
- Machine Learning in performance management
- AI-driven talent management and HR leadership
- AI in customer-centric leadership strategies

- Digital transformation leadership models
- Organizational change management in AI adoption
- Cross-functional leadership in AI-driven organizations
- Case studies of AI-led organizational transformation

Day 4: Governance, Ethics, Risk, and AI Strategy

- AI governance frameworks and leadership responsibilities
- Ethical implications of Generative AI in leadership
- Regulatory and compliance considerations in AI adoption
- Risk management in AI-driven organizations
- Data privacy and cybersecurity leadership challenges
- Responsible AI and organizational accountability
- Strategic alignment between AI and corporate governance
- Building AI policies and leadership guidelines
- Stakeholder management in AI transformation
- Developing organizational AI strategies

Day 5: Strategic Implementation and AI Leadership Roadmap

- Designing AI-driven leadership and management roadmaps
- Integrating AI into corporate strategy and operations
- Change leadership in AI transformation
- Measuring the impact of AI on organizational performance
- KPIs and metrics for AI-driven leadership
- Building AI-ready organizational culture

- Leadership competencies for the AI era
- Scaling AI initiatives across the organization
- Future trends in Generative AI and leadership
- Executive action plan for AI-driven leadership.
