

*Training Course:
Strategic IT and Surveillance Management for
Security and Digital Operations*

21 - 25 June 2026

Cairo (Egypt)

Holiday Inn & Suites Cairo Maadi, an IHG Hotel

Training Course: Strategic IT and Surveillance Management for Security and Digital Operations

Training Course code: IT236398 From: 21 - 25 June 2026 Venue: Cairo (Egypt) - Holiday Inn & Suites Cairo Maadi, an IHG Hotel Training Course Fees: 4100 € Euro

Introduction

The rapid evolution of digital technologies and security systems has significantly expanded the role of IT and surveillance officers within modern organizations. These professionals are no longer limited to technical support or monitoring functions; they are increasingly required to understand system architecture, cybersecurity risks, digital governance, and the strategic integration of IT and surveillance systems.

This training program, designed by Global Horizon Training Center, provides participants with a comprehensive theoretical framework for understanding IT and surveillance systems, their governance, and their strategic role in organizational security and digital transformation. The program emphasizes conceptual knowledge, analytical understanding, and best-practice models that enable participants to enhance their professional competence and contribute effectively to organizational objectives.

Objectives

By the end of this training program, participants will be able to:

- Understand the conceptual foundations of IT and surveillance systems.
- Analyze the structure and functions of modern IT and monitoring environments.
- Identify key risks and challenges associated with IT and surveillance operations.
- Understand cybersecurity principles relevant to surveillance and IT infrastructure.
- Interpret governance, policies, and standards related to IT and security systems.
- Evaluate system performance and organizational readiness from a strategic perspective.
- Understand incident management frameworks and escalation models.
- Align IT and surveillance functions with organizational strategy and security objectives.

Target Audience

This program is intended for:

- IT Officers and IT Support Professionals
- Surveillance and Control Room Officers
- Security Systems Professionals

- Network and Systems Administrators
- Technical Security Personnel
- Control Room and Monitoring Staff
- Junior and Mid-Level IT and Security Professionals
- Professionals responsible for IT and surveillance governance and oversight

Outlines

Day 1: Conceptual Foundations of IT and Surveillance Systems

- Evolution of IT and surveillance roles in modern organizations
- Overview of IT infrastructure concepts and digital ecosystems
- Fundamentals of surveillance systems and monitoring architectures
- Interrelationship between IT systems and security operations
- Strategic importance of IT and surveillance in organizational resilience

Day 2: IT Architecture and Digital Infrastructure Governance

- Concepts of network architecture and system design
- Models of IT infrastructure and enterprise systems
- Governance frameworks for IT and digital systems
- Policies, procedures, and documentation in IT and surveillance environments
- Roles and responsibilities within IT and security governance structures

Day 3: Cybersecurity and Risk Management in IT and Surveillance

- Core principles of cybersecurity in IT and surveillance contexts
- Threat landscapes and vulnerability concepts
- Risk management frameworks for digital and surveillance systems
- Data protection, privacy, and ethical considerations
- Overview of international standards ISO, NIST, COBIT, etc.

Day 4: Surveillance Strategy and Incident Management Frameworks

- Strategic models of surveillance and monitoring operations
- Incident management concepts and escalation frameworks
- Integration of surveillance systems with organizational security strategy
- Information management and reporting structures
- Organizational communication in security and IT contexts

Day 5: Strategic Integration and Future Trends in IT and Surveillance

- Integration of IT, surveillance, and organizational strategy
- Digital transformation and smart surveillance concepts
- Emerging technologies in IT and security systems
- Business continuity and resilience from a strategic perspective
- Professional and organizational development in IT and surveillance functions.
