Training Course: Operational GRC Excellence: Bridging Compliance, Risk & Safety

Training Course code: SC236423 From: 29 June - 3 July 2026 Venue: Paris (France) - Training Course Fees: 6300 € Euro

Introduction

In today's high-risk and highly regulated environments, organizations must move beyond traditional compliance checklists and adopt an integrated Governance, Risk, and Compliance GRC approach. For professionals operating in Occupational Health & Safety OHS and regulatory compliance roles, operational excellence depends on aligning risk management frameworks, compliance systems, and safety governance into a cohesive structure.

The [Operational GRC Excellence: Bridging Compliance, Risk & Safety](#) program is designed by [Global Horizon Training Center](#) to equip compliance leaders, OHS managers, and risk professionals with advanced tools to implement risk-based compliance systems, strengthen governance oversight, and embed a safety-driven risk culture across operations.

This program bridges strategic governance frameworks with day-to-day operational risk controls, ensuring compliance becomes proactive, measurable, and performance-oriented.

Program Objectives

By the end of this program, participants will be able to:

- Understand the integrated GRC framework and its operational application
- Align OHS compliance with enterprise risk management ERM principles
- Implement risk-based compliance monitoring systems
- Design internal control structures to mitigate operational risks
- Strengthen governance oversight in safety and regulatory environments
- Develop risk dashboards and compliance KPIs
- Build a proactive safety and compliance culture

Course Methodology

The program uses a structured executive-level methodology including:

- Governance & risk framework analysis
- Case studies from high-risk industries
- Risk mapping workshops

- Compliance control simulations
- Group exercises on real operational scenarios
- Development of a practical GRC implementation roadmap

Organizational Impact

Organizations sending participants to this program will benefit from:

- Improved regulatory compliance maturity
- Reduced operational and safety risks
- Stronger internal control environment
- Enhanced audit readiness
- Integrated safety and governance alignment
- Risk-informed decision-making processes

Target Audience

- OHS Compliance Assistant Managers
- Compliance Managers & Officers
- Risk Management Professionals
- Internal Auditors
- Safety & Operational Risk Leaders
- Governance & Control Specialists

Outlines

Day 1:

Foundations of Operational GRC Integration

- Introduction to Governance, Risk & Compliance GRC architecture
- Evolution from traditional compliance to integrated GRC
- The three lines model in operational environments

- Linking OHS governance with enterprise risk frameworks
- Regulatory landscape and compliance obligations
- Identifying operational compliance gaps

Workshop: Mapping your current compliance & safety structure against GRC components

Day 2:

Risk-Based Compliance & Operational Risk Management

- Enterprise Risk Management ERM fundamentals
- ISO 31000 risk principles applied to OHS
- Risk identification techniques in operational settings
- Risk assessment methodologies qualitative & quantitative
- Risk appetite and tolerance in safety governance
- Building risk registers aligned with compliance requirements

Workshop: Developing an operational risk register for OHS compliance

Day 3:

Internal Controls, Monitoring & Compliance Assurance

- Designing effective compliance control systems
- Preventive vs detective controls in safety management
- Compliance monitoring frameworks
- Control testing and assurance mechanisms
- Incident investigation from a governance perspective
- Root cause analysis in risk-based compliance

Case Study: Compliance failure & safety incident governance breakdown

Day 4:

Governance Oversight, KPIs & Reporting

- Governance structures for operational compliance

- Roles of board, management & compliance units
- Developing GRC dashboards & reporting systems
- Compliance KPIs & KRIs for safety performance
- Audit readiness & regulatory inspections
- Data-driven compliance monitoring

Workshop: Designing a compliance & safety dashboard

Day 5:

Embedding a Risk & Safety Culture

- Leadership role in operational GRC
- Building a compliance-driven safety culture
- Ethics, accountability & whistleblowing frameworks
- Integrating ISO 45001 & compliance systems
- Crisis management & regulatory response
- Developing a practical GRC implementation roadmap

Final Exercise: Building a 6-month Operational GRC improvement plan
