

*Training Course:  
ERP Systems*

*12 - 16 July 2026  
Beirut (Lebanon)*

## Training Course: ERP Systems

Training Course code: IT236454 From: 12 - 16 July 2026 Venue: Beirut (Lebanon) - Training Course Fees: € Euro

### Introduction

Enterprise Resource Planning ERP systems are integrated software platforms that help organizations manage and automate core business processes such as finance, human resources, procurement, supply chain, and operations. ERP systems enable data centralization, improve decision-making, and enhance operational efficiency across departments.

This training program is designed by Global Horizon Training Center to provide participants with a solid understanding of ERP concepts, implementation processes, and practical usage. The program combines theoretical knowledge with hands-on insights into how ERP systems support business integration, improve performance, and drive digital transformation.

### Objectives

By the end of this program, participants will be able to:

- Understand the fundamentals and architecture of ERP systems
- Identify key ERP modules and their business functions
- Analyze business processes and align them with ERP solutions
- Understand ERP implementation life cycle and methodologies
- Evaluate ERP systems and vendors
- Recognize common challenges and success factors in ERP projects
- Utilize ERP systems for reporting, analysis, and decision-making

### Target Audience

This program is designed for:

- IT professionals and system administrators
- Business analysts and process improvement specialists
- Finance, HR, and operations staff using ERP systems
- Project managers involved in ERP implementation

- Decision-makers evaluating ERP solutions
- Consultants and professionals involved in digital transformation
- Beginners seeking to understand ERP systems

## Outlines
