Training Course: Integrated Risk Management

Training Course code: MA236493 From: 20 - 24 September 2026 Venue: Cairo (Egypt) - Holiday Inn & Suites Cairo Maadi, an IHG Hotel Training Course Fees: 3750 € Euro

Introduction

Integrated Risk Management (IRM) is a strategic and enterprise-wide approach that enables organizations to effectively identify, assess, monitor, and respond to risks across all operational, financial, technological, compliance, and strategic areas. In today's rapidly changing business environment, organizations are exposed to increasingly complex risks including operational disruptions, cyber threats, regulatory challenges, financial instability, reputational exposure, and crisis situations. Managing these risks through isolated methods is no longer sufficient for achieving organizational resilience and sustainable growth.

This training program, designed by Global Horizon Training Center, provides participants with practical knowledge, modern methodologies, and internationally aligned frameworks for implementing an integrated risk management system within their organizations. The program focuses on strengthening governance, improving decision-making capabilities, enhancing organizational resilience, and establishing a proactive risk management culture that supports operational excellence and strategic objectives.

Through practical workshops, case studies, discussions, and applied exercises, participants will gain the competencies required to identify emerging risks, evaluate organizational vulnerabilities, implement mitigation strategies, support business continuity, and develop effective risk reporting and monitoring systems.

Course Objectives

By the end of this training program, participants will be able to:

- Understand the principles and frameworks of Integrated Risk Management
- Identify strategic, operational, financial, and compliance-related risks
- Apply modern risk assessment and analysis techniques
- Develop effective risk mitigation and internal control strategies
- Integrate risk management into organizational planning and decision-making
- Improve organizational resilience and business continuity capabilities
- Monitor and report risks using practical tools and methodologies
- Strengthen governance and compliance management practices
- Enhance crisis preparedness and emergency response planning
- Build a proactive and sustainable risk-aware organizational culture

Course Methodology

This training program uses an interactive and practical methodology designed to maximize participant engagement and knowledge application. The methodology includes:

- Interactive presentations and facilitated discussions
- Practical workshops and group exercises
- Real-world case studies and risk scenarios
- Risk assessment and mitigation activities
- Crisis management simulations
- Experience-sharing sessions and best-practice reviews
- Applied exercises in risk reporting and monitoring
- Individual and team-based learning activities

Organizational Impact

Organizations participating in this program will benefit from:

- Enhanced enterprise-wide risk visibility and control
- Improved organizational resilience and preparedness
- Stronger governance and compliance frameworks
- Better strategic and operational decision-making
- Reduced operational disruptions and risk exposure
- Improved crisis response and business continuity readiness
- More effective internal controls and monitoring systems
- Increased stakeholder confidence and organizational credibility
- Strengthened risk communication and reporting practices
- Development of a proactive organizational risk culture

Target Audience

This program is designed for:

- Risk Management Professionals
- Governance and Compliance Officers
- Internal Auditors
- Operations and Department Managers
- Business Continuity Professionals
- Project Managers
- Finance and Investment Professionals
- HSSE and Security Personnel
- Strategic Planning Specialists
- Senior Executives and Decision Makers
- Professionals responsible for organizational governance and risk oversight
