Training Course: Accident & Incident Investigation - Risk & Root Causes

Training Course code: HE236596 From: 19 - 23 October 2026 Venue: Kuala Lumpur (Malaysia) - Training Course Fees: 6300 € Euro

Introduction

This training program, designed by [Global Horizon Training Center](#), equips participants with the knowledge and practical skills required to effectively investigate workplace accidents and incidents, identify immediate and underlying causes, analyze organizational risks, and implement preventive actions. The program follows internationally recognized investigation methodologies and root cause analysis techniques to strengthen safety performance, reduce recurrence of incidents, and foster a proactive safety culture across the organization.

Training Objectives

By the end of this program, participants will be able to:

- Understand the principles of accident and incident investigation.
- Differentiate between immediate, underlying, and root causes.
- Apply systematic investigation methodologies.
- Collect and preserve evidence effectively.
- Conduct interviews with witnesses and involved personnel.
- Perform root cause analysis using recognized techniques.
- Assess operational risks contributing to incidents.
- Develop practical corrective and preventive actions.
- Prepare professional investigation reports.
- Improve organizational safety performance through lessons learned.

Course Methodology

The program includes:

- Instructor-led presentations
- Case study analysis
- Practical investigation exercises

- Root cause analysis activities
- Incident reconstruction techniques
- Risk assessment applications
- Individual practical assignments
- Interactive discussions

Organizational Impact

Upon completion, organizations will benefit from:

- Improved incident investigation quality
- Reduced recurrence of workplace accidents
- Better regulatory compliance
- Stronger safety culture
- Improved hazard identification
- More effective corrective actions
- Enhanced operational reliability
- Better decision-making based on investigation findings

Target Audience

This program is designed for:

- HSE Managers
- Safety Engineers
- Safety Officers
- Plant Managers
- Operations Supervisors
- Maintenance Engineers
- Risk Management Professionals
- Quality Managers
