Training Course: Public Policy Transformation through Agentic AI and Regulatory Innovation

Training Course code: SC236551 From: 8 - 12 November 2026 Venue: Dubai (UAE) - Training Course Fees: 5390 € Euro

Introduction

Artificial Intelligence is rapidly reshaping the future of government, public administration, and regulatory systems. The emergence of Agentic AI—autonomous AI systems capable of planning, reasoning, and executing complex tasks—presents both unprecedented opportunities and significant governance challenges for public institutions. Governments must modernize policy frameworks, regulatory approaches, and leadership capabilities to harness AI responsibly while maintaining transparency, accountability, security, and public trust.

Designed by Global Horizon Training Center, this executive program equips senior public sector leaders with the strategic knowledge and practical frameworks needed to transform public policy through Agentic AI and regulatory innovation. Participants will explore international best practices, adaptive governance models, AI-enabled policymaking, ethical considerations, and institutional transformation strategies to build resilient, future-ready governments.

Objectives

By the end of this program, participants will be able to:

- Understand the strategic impact of Agentic AI on public policy and government transformation.
- Evaluate emerging AI governance models and adaptive regulatory frameworks.
- Design AI-enabled public policies that balance innovation with accountability.
- Strengthen institutional readiness for AI adoption across the public sector.
- Apply international best practices in AI governance and regulatory innovation.
- Manage legal, ethical, cybersecurity, and operational risks associated with autonomous AI systems.
- Lead organizational transformation initiatives driven by AI technologies.
- Develop future-oriented policy strategies using strategic foresight and scenario planning.
- Foster public trust through responsible AI governance and transparent decision-making.
- Build resilient public institutions capable of adapting to rapid technological change.

Target Audience

This program is designed for:

- Ministers and Deputy Ministers
- Government Executives
- CEOs and Deputy CEOs of Public Organizations
- Undersecretaries and Assistant Undersecretaries
- Regulatory Authority Leaders
- Executive Directors
- Public Policy Advisors
- Digital Government Leaders
- Directors of Strategy and Innovation
- Heads of Regulatory Affairs
- AI Governance Officers
- Public Sector Transformation Leaders
- Board Members of Government Entities
- Senior Decision Makers responsible for digital transformation and public policy

Outline

Day One: The Future of Public Policy in the Age of Agentic AI

- Evolution of public policy in the digital era
- Understanding Agentic AI and autonomous decision-making
- AI-driven government transformation
- Global trends in digital governance
- Strategic implications of Agentic AI for public institutions
- AI opportunities and challenges for policymakers

- Executive workshop: Assessing AI readiness in government organizations

Day Two: Regulatory Innovation and Adaptive Governance

- Modern regulatory frameworks for emerging technologies
- Principles of adaptive and agile regulation
- Risk-based and outcome-focused regulation
- Regulatory sandboxes and innovation ecosystems
- International AI regulatory models and standards
- Comparative analysis of global AI governance frameworks
- Executive workshop: Designing adaptive AI regulatory strategies

Day Three: AI Governance, Ethics, and Risk Management

- Governance frameworks for Agentic AI
- Executive oversight and accountability
- Responsible AI principles and ethical decision-making
- Transparency, explainability, and public trust
- Cybersecurity, privacy, and AI assurance
- Managing legal and operational risks
- Executive workshop: Developing an AI governance framework

Day Four: Policy Innovation through Agentic AI

- AI-assisted policy design and evaluation
- Predictive analytics for policymaking
- Strategic foresight and scenario planning
- AI-enabled public service innovation
- Citizen-centric digital government
- Cross-sector collaboration and ecosystem leadership
- Executive workshop: Building AI-enabled policy solutions

Day Five: Executive Leadership for AI Transformation

- Leading organizational transformation with AI
- Building AI capabilities across government
- National AI strategies and implementation roadmaps
- Change management and stakeholder engagement
- Institutional resilience and future-ready governance
- Measuring AI policy impact and performance
- Executive Capstone: Developing a Public Policy Transformation and Regulatory Innovation Roadmap
