Training Course: Certified Information Privacy Technologist (CIPT)

Training Course code: IT234732 From: 8 - 12 August 2027 Venue: Istanbul (Turkey) - DoubleTree by Hilton Istanbul Esentepe Training Course Fees: 6300 ₺ Euro

Introduction

The "how" of privacy and technology. Certified Information Privacy Technologist CIPT training covers privacy and data protection practices in the development, engineering, deployment and auditing of IT products and services. Those taking the course will develop an understanding of privacy-related issues and practices in the context of the design and implementation of information and communication technologies and systems. The Certified Information Privacy Technologist CIPT Training is based on the body of knowledge for the IAPP's ANSI-accredited Certified Information Privacy Professional/ U.S. CIPT/US certification program. Launched by the IAPP in 2014, the CIPT is the first and only certification of its kind worldwide to meet the growing need that only tech pros can fill—securing data privacy at all stages of IT product and service lifecycles.

This training will be as a preparation course for becoming a Certified Information Privacy Technologist CIPT.

Course Objectives

- Critical privacy concepts and practices that impact IT
- Consumer privacy expectations and responsibility
- How to bake privacy into early stages of IT products and services for cost control, accuracy and speed-to-market
- How to establish privacy practices for data collection and transfer
- How to preempt privacy issues in the Internet of Things
- How to factor privacy into data classification and emerging tech such as cloud computing, facial recognition and surveillance
- How to communicate privacy issues with partners such as management, development, marketing and legal.

Target Audience

Professionals who works in:

- IT
- security
- engineering

Course outlines

Day 1: Fundamentals of Information Privacy
