Training Course: Advanced Cash Flow & Working Capital Management

Training Course code: FI2006 From: 24 - 28 May 2027 Venue: Trabzon (Turkey) - Training Course Fees: 5775 ₺ Euro

Introduction

In recent years there has been a growing recognition that, in the long run, effective management of cash flow is more important than profit. Long-term cash flow is the real value of a business. It has also been recognized that there is significant potential for improved financial performance from the more effective management of working capital - both directly from immediate cash gains and reduced net interest costs, and indirectly through its impact on increased profitability and return on capital employed. A key challenge in achieving these performance improvements results from the fact that actual levels of working capital and delivery of cash flow are effectively determined by the day-to-day actions of a great many managers and staff, which in large corporations often run into tens of thousands.

This highly participative 5-day seminar covers the principles, techniques and skills involved in the effective management of cash flow and working capital in any business, blending a clear theoretical framework with extensive use of real-life examples and case studies.

Key areas covered in this program include:

- Optimizing working capital
- Managing accounts receivable
- Managing inventory
- Strategic management of cash & working capital
- Planning, forecasting and monitoring cash and working capital
- Financial modeling tools and techniques for cash and working capital management

Objectives

By the end of this program you will be able to:

- Acquire an understanding of the fundamentals of effective management of cash flow, including the optimization of the level of working capital.
- Develop practical experience of how to manage cash flow and optimize working capital to facilitate such delivery in real-life business situations.
- Increase personal financial skill levels
- Develop confidence through understanding the major drivers of successful financial performance.

- Learn a number of technical skills, all of which lead to the ability to calculate the required figures and implement them into value-adding business decisions.

Target Audience

- Finance managers and financial controllers
- Treasury and cash management professionals
- Working capital management specialists
- Corporate finance professionals
- Management accountants
- Budgeting and planning professionals
- Credit control and accounts receivable managers
- Inventory and supply chain finance professionals
- Business analysts and performance improvement professionals
- Operations and project managers involved in cost and cash control
- Internal auditors and risk management professionals
- Entrepreneurs and business owners focused on liquidity and cash flow management
- Professionals seeking practical skills in cash flow and working capital optimization
