Conference: Process Plant Start-up, Troubleshooting & Commissioning

Conference code: CO8227 From: 12 - 16 July 2027 Venue: Kuala Lumpur (Malaysia) - Conference Fees: 6300 € Euro

Introduction

There is an alarming trend in the industry to discount the potential contribution of the Technical/Operations function to productivity improvement, product quality, and gains in market share. Principles taught in this training session will help you to understand the true nature and different techniques of problem-solving and problem prevention in the operational/process environment.

Excellent Troubleshooting skills are considered a core competency for 'Best-in-Class' industrial companies. If your company's goals include minimizing downtime then this workshop is a must because it delivers rapid, safe Troubleshooting.

Objectives

- How to become a 'Top Gun' Troubleshooter by acquiring new skills
- To develop a structured approach to Troubleshooting and Problem Solving which uses common terminology and shared understanding
- To point the way to Continuous Improvement in the way you run your processes and make incremental efficiency gains
- To understand the difference between having techniques manual on the bookshelf - and making it work
- To identify the "motivated" people who should be the champions of Troubleshooting and Problem Solving - and who should just follow
- To understand work practices that "allow" success in Troubleshooting and Problem Solving by reducing the variability of your process

Target Audience

This workshop is designed for:

- Operations Managers and Plant Managers
- Process Engineers and Production Engineers
- Maintenance Engineers and Reliability Engineers
- Commissioning Engineers and Start-up Specialists
- Industrial Troubleshooting and Problem-Solving Teams
- HSE and Quality Assurance Professionals involved in operational performance
- Technical Supervisors and Shift Leaders
- Mechanical, Electrical, and Instrumentation Engineers
- Continuous Improvement and Process Optimization Specialists

- Project Engineers involved in plant commissioning and operations
- Professionals seeking to improve troubleshooting skills, reduce downtime, and enhance operational efficiency

Outlines

Day 1: Introduction and Preparation
